Jackson Wisener and Luisey Jane Wigley appear to be cousins of a sort. Jackson's mother Ellender "Nellie" Wigley is d/o Allen Daniel Wigley Sr. and wife Luisey Jane Wigley is d/o James Andrew Wigley. At this point it gets into the problems that go along with the Wigley tree at these branches.....James Andrew Wigley married Julia Parris and supposed brother William Wigley married Julia's supposed sister Frances "Fanny" Parris (my ancestors)..... both of these relationships are very much in dispute amongst the descendant researchers.....now from my family tradition (unprovable) James and William are son's of Joseph Wigley and he is s/o Allen Daniel Wigley Sr.....now assuming this is correct even though it's probably full of errors that would make Luisey and Jackson 1st cousins 1 generation removed.....in other words Allen Daniel Wigley Sr.'s grandson Jackson Taylor Wisener married Allen Daniels Gr granddaughter Luisey Jane Wigley. This type of marriage is not at all unusual and happened all the time. Any corrections or additions to this post would be most appreciated.
